

GAMBICA

BIVDA

British In Vitro Diagnostics Association

UK PAVILION at

GAMBICA

is the Trade Association for Instrumentation, Control, Automation and Laboratory Technology in the UK. Our insight and influence help our members to be more competitive by increasing their knowledge and impact. Together we remove barriers and maximise the market potential in our industry.

Please visit our booth in hall 1, number 1G03-3. Alternatively we can be contacted at info@gambica.org.uk or visit our website www.gambica.org.uk

We are delighted to introduce the following companies, exhibiting as part of our **UK pavilion in Hall 1, at MEDICA 2024**. To find out more our group participants take a look at their website, and why not pay a visit to their stand at the event? A map of our pavilion is provided at the end of this Guide.

APTO-GEN

1F09-3

Apto-Gen is a technology-driven company dedicated to providing customized PCR and (RT-)qPCR solutions for our customers' applications. We manufacture market-leading molecular biology reagents for direct integration into point-of-care and high-throughput diagnostic workflows. By specializing in lyophilization-compatible enzyme and reagent technologies, we offer more environmentally sustainable products by reducing cold chain storage and product wastage.

Our mission is to improve DNA and RNA detection for more accurate diagnoses by bringing bespoke, high-quality molecular biology reagents to the healthcare and biotechnology markets.

Biofortuna is a contract assay development and manufacturing organisation providing a flexible and scalable outsourcing service to the sector's leading in-vitro and point-of-care assay developers.

Our services are wide-ranging but our objectives are the same; to form long term partnerships and become a valued extension of your team.

We do that by solving problems and presenting opportunities. We listen to your requirements, develop customised solutions and deliver them with openness and transparency.

Our service portfolio includes: Genomic services, Cell banking services, Custom assay development, Lyophilisation, Contract manufacturing, Dispensing & kitting, Biobanking and ICH Stability storage.

info@biofortuna.com

BIVDA is the national industry association for manufacturers and distributors of medical diagnostic tests in the UK, representing 97% of the industry and nearly 250 organisations.

We advocate on behalf of industry to ensure that medical diagnostics can play a part not only in the diagnosis of conditions, but in prevention and treatment of disease.

Our key areas of focus are Antimicrobial Resistance and Infectious Disease, Near Patient Testing and pathway innovation together with Genomics in Cancer, Infection, and both rare and common diseases. Our 2024-2027 strategy sets out how we will deliver this, and we welcome you on the journey.

Since 1952, Medical Wire & Equipment Co. Ltd has been a pioneer in laboratory science and the development of pre-analytical medical devices. By maintaining the highest standards, we empower healthcare providers and researchers to make informed decisions that drive the right actions. Our innovations, like the SIGMA Liquid Range, enable precise specimen collection and transportation in its optimum condition. The liquid format allows for aliquoting for multiple tests from a single sample. Our sterile, pre-moistened blue sponge swab, POLYWIPE™, excels in microbial surface sampling for infection control and the food industry.

Trust us for reliable sample collection, because results matter.

A long-established manufacturer of a wide range of Histology Waxes, supplying many companies on an OEM basis. We can offer counter types to most of the popular brands on the market. Our histology waxes are exported to over 55 countries. Every batch is sent to a working hospital where the paraffin is set into various tissue types and performance tested for infiltration, ease of cutting, ribboning and section quality. We are ISO 9001:2015 accredited and IVD registered and are in the process of securing ISO 13485. We provide a complete OEM customer service from product manufacture, testing and approval. Design, procurement and filling of printed packaging and destination delivery. We offer pack size options from 1 kilo bags and pouches up to 25 kilo cartons and labelled packaging for smaller runs.

One of the UK's leading laboratory autoclave manufacturers, has developed the most comprehensive range of standard steam sterilisers with models providing a choice of chamber sizes from 40 to 700 litre capacity. There are a number of styles to choose from – front and top loading, circular and rectangular chambers to suit load requirements, as well as design formats from small benchtop to high capacity chambers, even autoclaves with double-door configurations.

All models are designed and built at the company's manufacturing centre in London which has the added benefit that should a customer require a special autoclave for a unique application Priorclave is able to create a bespoke build.

TCS is a manufacturer and distributor of laboratory reagents, test kits and quality control reagents for the Clinical, Pharmaceutical, Food and Water sectors. Our commitment to supplying quality and innovative products helps our customers to excel in the provision of clinical care, medicines, food and drinking water.

In our 50 year history we have established ourselves as Europe's foremost supplier of animal blood and sera for microbiological use. We are also a prominent player in the UK water industry and in the European pharmaceutical market. At TCS, we are focused on developing our presence and product portfolio in each market sector, without compromising our core business value . . . Quality. TCS Biosciences, your partner: For Life.
