

GAMBICA

UK PAVILION at Analytica

analytica 2022
21.-24. JUNI | MÜNCHEN

GAMBICA is the Trade Association for Instrumentation, Control, Automation and Laboratory Technology in the UK. We represent the UK supply industry, with over 200 members, across the range of major multi-nationals to small and medium sized companies

Our members provide the complete range of world-class products and services for the laboratory

- ◆ Instrumentation ◆ Equipment ◆ Diagnostics ◆ Molecular Diagnostics ◆ Reagents & Chemicals ◆ Complete Laboratories
- ◆ Consumables & Disposables ◆ Furniture & Fume cupboards ◆ Sterilisation & Disinfection

We are delighted to return to Analytica 2022 and very proud to, once again, support the UK Pavilion at the world's leading trade fair for laboratory technology, analysis and biotechnology

Below you will find more information on our pavilion members and their products and services. To visit a website click on the link within their listing. Or even better, visit their stand within the pavilion and let's make the most of being able to meet in person once again! We look forward to seeing you there.

Thank you

KNOWLEDGE

INFLUENCE

COMMUNITY

Adam Equipment is a leading, ISO9001:2015-accredited manufacturer and designer of professional analytical and precision balances, weighing scales, moisture analysers and anti-vibration tables for laboratories worldwide. Packed with intuitive features, Adam products deliver the perfect balance of dependability and performance, facilitating everyday lab work and simplifying complex weighing and measuring applications.

Founded in 1972 and headquartered in the UK, Adam Equipment has offices and distribution centres in Germany, the United States, South Africa, Australia and China. Adam products are sold globally via an established network of dealers, to lab, education, industrial, food and veterinary markets. If accuracy is everything – choose Adam

ATC manufacture high quality temperature control products in the UK Specialising in the manufacture of recirculating chillers, water to water heat exchangers, airblast coolers and flat bed coolers from 500W to 1M

Manufacturers of diagnostics, stains and ready reagents. Suppliers of chemicals and solvents

Avidity Science is bringing the Avidity Science i-Series, the latest portfolio of laboratory water purification units to Analytica. Every aspect of its design is engineered to provide a pure water supply of proven and consistent quality as purified water is the most important and essential solvent required for any research or analytical laboratory.

Proven and consistent water quality is vital for reproducible results removing the uncertainty from varying water quality, meaning scientists have confidence in their results

MARKETING SCIENCE

AZoNetwork help Science companies with Marketing Strategy, Brand Awareness, Lead Generation and Proving ROI.

AZoNetwork is the leading content marketing platform for Science, Engineering and Healthcare:

135M scientists, researchers and engineers use AZoNetwork for the latest news and developments in their field.

900K+ GDPR-compliant subscribers from laboratory professionals to application scientists and engineers.

100 Newsletters from Antibodies and Analytical Chromatography, to XRF Spectroscopy and Zoonotic Infectious Diseases.

Visit Booth B1.329-2 and talk to our experts about your Marketing challenges or request a free Digital Marketing Health Check.

UK based with a worldwide reputation we specialise in producing thousands of high quality consumable products for elemental analysers at a great value price

Our purpose-built facility in Devon UK is fully accredited to ISO9001, ISO17025 and ISO17034. We supply everything you need for the daily operation of your analyser, whatever your instrument or model as well as introducing ICP-MS cones at Analytica.

We are a specialist in EA consumables – constantly developing, improving, testing and refining our production for over 45 years therefore we are very confident of the performance and quality of our products and offer a full money-back guarantee

We are dedicated to serving the EA and EA-IRMS communities and providing high quality affordable EA Consumables and Analytical Services. Based in Cornwall in the UK we have a global reach with a local perspective.

We have a range of services including

- Stable Isotope Analysis
- Elemental Analysis
- Sale of Elemental Analysis Consumables
- Supply of Laboratory Equipment

Elemtex - Expertise in all things Isotopic and Elemental

HTZ designs and manufactures automated laboratory instruments with a focus on the following areas:

- Robotic Liquid handling
- Tube handling
- Positive sample ID and data security
- Customised robotic mechanisms

Operating in the Clinical, Industrial and Pharma markets, we provide automated solutions for a wide range of laboratories through our global distributor network and OEM* partners

Priorclave, one of the UK's leading laboratory autoclave manufacturers, has developed the most comprehensive range of standard steam sterilisers with models providing a wide choice of chamber sizes from 40 to 700 litre capacity.

There are also a number of styles to choose from – front and top loading, circular and rectangular chambers to suit load requirements, as well as design formats from small benchtop to high capacity chambers, even autoclaves with double-door configurations.

All models are designed and built at the company's manufacturing centre in London which has the added benefit that should a customer require a special autoclave for a unique application Priorclave is able to create a bespoke build. This centre is also a UKAS accredited laboratory for calibration and performance qualification.

Suez offers pure and ultra pure water purification systems under the Purite brand for the laboratory and healthcare markets.

Our range covers a complete range of water qualities including Grade 1, 2, 3 and ultra pure water.

A wide range of product capacities is also possible from small lab units producing a few litres per hour up to larger systems that can produce 600 litres per hour and feed a pure water distribution loop.

Our units have the latest technology including remote dispense options and WiFi connectivity and can be linked with pressurised feed pumps and multiple size storage tanks.

Our range also includes units specifically designed to feed clinical analysers.

We are interested to hear from potential distributors in Europe and beyond. Pop by our stand for a chat

Experts in Sample Management with 2D Barcodes

Founded in 2005, Ziath develops innovative new products designed to simplify processes in life science organisations, from academia, to the biotech and pharma industries
