

GAMBICA

UK PAVILION at

GAMBICA

is the Trade Association for Instrumentation, Control, Automation and Laboratory Technology in the UK. Our insight and influence help our members to be more competitive by increasing their knowledge and impact. Together we remove barriers and maximise the market potential in our industry. Please visit our booth in hall 1, number 1G03-3. Alternatively we can be contacted at info@gambica.org.uk or visit our website www.gambica.org.uk We are delighted to introduce the following companies, exhibiting as part of our **UK pavilion in Hall 1, at MEDICA 2025**. To find out more our group participants take a look at their website, and why not pay a visit to their stand at the event? A layout map of our pavilion is provided at the end of this Guide.

2BScientific, with hubs in both UK and Germany, is a Life Science reagents distributor providing a novel, high-quality, and personal approach to the supply of research reagents and services to the European research market, in a way that supports Life Science through a number of sustainability initiatives for a better world. Focusing on research areas like Immunology, Neuroscience, Cell Biology, Veterinary etc in the RUO and IVD sectors, we aim to provide novel solutions that are relevant to today's researchers, with our commitment to work every day in accordance with our promise - "No one does more for the customer."

AbBaltis has been proudly supplying disease-state plasma, serum, urine, CSF, and whole blood for over 15 years, supporting diagnostic and life science innovation worldwide. We offer an extensive range of markers covering autoimmune, allergy, infectious diseases, as well as hormones and cancer markers. Recognised for setting the industry standard in specimen procurement, we ensure ethical sourcing and superior quality. Our expanding portfolio includes new additions such as RBC panels, GAD, and Myeloma materials. To help our partners evaluate quality first-hand, we also provide free-of-charge sample testing.

Apto-Gen is a technology-driven company dedicated to providing customized PCR and (RT-)qPCR solutions for our customers' applications. We manufacture market-leading molecular biology reagents for direct integration into point-of-care and high-throughput diagnostic workflows. By specializing in lyophilization-compatible enzyme and reagent technologies, we offer more environmentally sustainable products by reducing cold chain storage and product wastage. Our mission is to improve DNA and RNA detection for more accurate diagnoses by bringing bespoke, high-quality molecular biology reagents to the healthcare and biotechnology markets.
