GAMBICA

2BScientific

1 G03-6

www.2BScientific.com

2BScientific Limited is a UK based Life Science reagents distributor providing a new, modern and fun approach to the supply of research reagents. Engaging very closely with both our international supplier network and our very knowledgeable customer base we provide novel solutions relevant to today's researchers, with our commitment to work every day in accordance with the promise – "no one does more for the customer". Our extensive range of quality products offers value for money and always competitively priced ensuring we are the leading supplier of innovative life science reagents and bespoke custom services to the global research market.

AbBaltis

1 F11-3

www.abbaltis.com

Allergy, Autoimmune and Infectious disease state plasma and serum for production and QC purposes. Other biological fluids available such as urine, amniotic fluid and cerebral spinal fluid. Examples of markers include Milk IgE, Cod IgE, Beef IgE, Borrelia IgG, Toxo IgM, CMV IgM, Coxiella IgG, SSB, dsDNA, Ku and Celiac.

Abingdon Health

1 F11-4

www.abingdonhealth.com

Abingdon Health is a leading contract manufacturer and developer of rapid lateral flow immunoassay diagnostic tests and reader solutions, serving a global customer base. We offer an extensive suite of services, from assay development through scalable small and high-volume manufacturing to commercialisation, and reader customisation.

Abingdon Health is certified to ISO 9001:2015 and ISO 13485:2016 and is GMP compliant with the U.S. Food and Drug Administration (FDA).

Absolute Antibody

1 G03-8

www.absoluteantibody.com

Absolute Antibody offers antibody sequencing, engineering, and recombinant production services to diagnostic developers worldwide. We can sequence any antibody and manufacture reliable recombinant antibodies in any format, providing high quality, reproducibility, and flexibility for superior assay results. Our sequencing service allows us to sequence any antibody, starting from hybridoma cells, purified antibody protein or polyclonal antibodies, to protect your antibody from loss, mutation or contamination. We produce all antibodies at our ISO-certified manufacturing facility in a serum-free expression system, resulting in highly pure recombinant antibodies. We also offer a unique catalog of engineered recombinant antibodies and fusion proteins.

Apollo Scientific

1 G01-2

www.apolloscientific.co.uk

Apollo Scientific are a leading, dedicated supplier of chromogenic enzyme substrates to the in-vitro diagnostics and medical devices market. Our reliable range of high quality compounds mean superior sensitivity for target pathogens, low toxicity, and a reduced need for complementary reagents.

Astell Scientific

1 G11-1

www.astell.com

Astell Scientific is a world renowned manufacturer and supplier of steam sterilizers. Astell Scientific autoclaves, steam generators and effluent decontamination systems (EDS) are designed to meet the exacting demands of modern Laboratory, Research and Medical professionals, and as such incorporate innovations such as colour touchscreen controllers as standard throughout the range.

We manufacture:

- Circular section autoclaves from 30-330 litres
- Square Section autoclaves from 125 - 2000 litres
- Steam Generators up to 72 kW
- Effluent Decontamination Systems (EDS)
- Customized steam sterilizers to meet the most challenging of applications

All Astell autoclaves are manufactured in accordance with standards and directives including ISO 9001:2015, Pressure Equipment Directive (PED 2014/68/EU) and CE (Conformité Européenne).

Atom Scientific

1 F03-2

www.atomsscientific.com

Established in 2009, Atom Scientific brings 50 years of expertise in the fields of life science and fine chemicals manufacture and supply and has active distribution partners in over 30 countries.

Our facilities can accommodate single bottle requirements up to multiple 1000's to meet any lead time requirement. All chemicals and reagents offered by Atom Scientific are manufactured, packed and distributed on-site.

Baltimore Innovations

1 F11-5

www.baltimoreinnovations.com

We are experts in Moisture Control Packaging. We offer technical consultancy and products such as: Silica Gel Desiccants, Aluminium Foil Packaging & Roll-stock, Patented Desiccant Plastics, Liquid Absorbers and High-Speed Dispensing Machines to automate their inclusion.

Binding Site Immunologicals

1 F03-12

www.bindingsite.com

Binding Site is a global supplier of specialist protein products.

The Immunologicals Group focusses specifically on the supply of antibodies, antigens and reagents into research and manufacturing sectors, primarily covering myeloma, autoimmune and infectious disease areas.

Visit www.immunologicals.com for more information.

Centurion Scientific**1 F01-2**www.centurionscientificglobal.com

Centurion is the UK's leading manufacturer of centrifuges. Our products range from micro to floor-standing, ambient and refrigerated.

Clinical Laboratory International (CLI)**1 G03-4**www.clinlabint.com

Clinical Laboratory International is at the forefront of communication in the clinical chemistry and diagnostics market for over 40 years. With this experience in the laboratory publishing industry we are able to help you communicate your message in the most beneficial way.

Let us operate as your springboard from which you can launch and grow your business. At Pan Global media and publishing BV we can help you source the most relevant market information and at the same time raise your profile to customers who are looking for your products and solutions.

DWK Life Sciences**1 G11-3**www.scilabware.com

DWK Life Sciences, represented by SciLabware (a wholly owned company of DWK Life Sciences), manufacture and supply a complete portfolio of standard and bespoke primary packaging solutions and services that meet and exceed the rigorous requirements and expectations of our customers. From tubular glass vials, stoppers and caps for lyophilisation and diagnostic kits, glass tubes and caps for control reagents, dropper bottles, with dropper assemblies or tips and closures for blood grouping reagents and rare antisera, to additional services including depyrogenation, particulate cleaning and barcoding, we can offer our customers a full primary packaging solution, received ready to use.

Excelsior Scientific**1 F03-1**www.excelsiorscientific.com

Sterilisation Consumables, including Biological and Chemical Indicators, Lab equipment including: Autoclaves, Ovens, Incubators, Cooled Incubators, Fridges, Freezers, Centrifuges & Climatic chambers.

Expedeon**1 H09-1**www.expedeon.com

Expedeon is a world-leading expert in cutting edge innovative reagents and services for life sciences and diagnostics, with application across workflows including: protein electrophoresis; liquid biopsy; whole genome amplification; antibody and protein labeling; and immunoassay development.

The company's product ranges are of the highest quality and are designed to streamline R&D and manufacturing processes, whilst also reducing overall project costs by cutting costs associated with material waste, QC failures, in-house equipment, and time, providing increased return on investment compared to traditional methods.

The company is multinational with laboratories and manufacturing facilities in the UK, USA, Spain, Germany and Singapore.

GAMBICA is the Trade Association for Instrumentation, Control, Automation and Laboratory Technology in the UK. Our insight and influence help our members to be more competitive by increasing their knowledge and impact. Together we remove barriers and maximise the market potential in our industry.

GAMBICA members are active in the following sectors:

- Industrial automation products and systems
- Process instrumentation and control
- Laboratory technology
- Test and measurement equipment for electrical and electronics industries

Glentham Life Scienceswww.glentham.com

Glentham Life Sciences is a leading supplier of fine chemicals, raw materials, reagents and life science products. Our company was founded in 2013 with a vision to deliver high quality, fully documented fine chemical products to a range of industries and academia worldwide. Glentham Life Sciences has quickly become a well-known and trusted brand, with customers throughout Europe, Africa, the Americas, Asia and Australasia.

We now have around 2,000 products in stock with key product ranges including: Amino acids, Antibiotics, APIs, Biological Buffers, Carbohydrates and Dyes & Stains.

1 F03-6The logo for Glentham Life Sciences features the word "Glentham" in a large, blue, serif font, with "LIFE SCIENCES" in a smaller, blue, sans-serif font underneath it. A thin blue horizontal line is positioned between the two words.

Imutestwww.imutest.com

Imutest offers a range of UK developed/manufactured test kits for allergy which cover the most common environmental and food allergens. These are simple-to-do tests using a small finger prick sample of blood with results in 30 mins ... results with Imutest correlate very well with results using the 'gold-standard' laboratory IgE method (Phadia's ImmunoCAP).

When you know what is causing your allergy symptoms, you can then take the necessary steps (medication and/or avoidance measures) to reduce your exposure to the offending allergen.

Imutest allergy test kits have CE Mark approval for self-testing, so they can either be purchased by the patient for testing themselves in the privacy of their own home, or can be used by a healthcare professional (e.g. private doctor, retail pharmacist, nutritionist, homeopath, etc) as part of a service to the patient in a non-laboratory setting.

1 F11-6The Imutest logo consists of a green icon on the left, which is a stylized representation of a person or a test kit, followed by the word "imutest" in a blue, sans-serif font.

International Hospital (IHE)

1 G03-4

www.interhospi.com

International Hospital (IHE) reports on medical technology news and solutions for the modern hospital in an easily digestible format and targets hospital directors, healthcare IT specialists, biomedical engineers, senior physicians and medical department heads in Europe, Middle-East, Asia/Pacific and Latin America.

Now entering its 45th year, International Hospital operates as the medical devices information portal connecting healthcare professionals to global suppliers. The magazine covers all aspects of medical technology and hospital equipment and is packed with information of direct relevance to everyone in the healthcare industry.

International Scientific Supplies

1 G03-9

www.intscientific.com

I.S.S. are an independent British manufacturer of premium quality laboratory disposables, specialising in specimen collection and liquid handling.

I.S.S. manufacture and distribute from our factory in Yorkshire supplying products through a network of distributors worldwide.

I.S.S. specimen containers range from 0.25ml to 5000ml, including 2ml micro tubes and straight sided containers from 30ml to 250ml.

I.S.S. sample handling and transportation range includes transfer pipettes, capillaries, pipette tips, test tubes, Minigrip® and specimen bags, UN3373 containers and bags, 95kPa mailing tubes and bags.

I.S.S. also supply microscope slides and coverslips, weigh boats, petri dishes, autoclave bags and tape, swabs and loops.

International Scientific Supplies Ltd

Jackson ImmunoResearch Europe

1 F03-9

www.jacksonimmuno.com

Jackson ImmunoResearch manufactures secondary antibodies and conjugates, with an outstanding reputation for quality, earned over 35 years. Our products are used in Western Blotting, IHC/ICC/IF, Flow Cytometry, ELISA, Electron Microscopy and many other immunological techniques. From our UK office we serve Europe with euro pricing, technical service and fast delivery

JSB UK & Northern Ireland

1 G03-4

www.go-jsb.co.uk

Publishers of trade journals since 1977:

CLINICAL LABORATORY INTERNATIONAL: Trade journal for the clinical diagnostic market, providing information of direct relevance to everyone in the in-vitro diagnostics field and all related disciplines.

INTERNATIONAL HOSPITAL: This trade magazine covers all aspects of medical technology and hospital equipment and is packed with information relevant to everyone in the healthcare industry.

Lorne Laboratories

1 F03-11

www.lornelabs.com

Lorne Laboratories manufacture a broad range of blood grouping reagents for blood transfusion and simple to use diagnostic kits. We supply these at affordable prices and back this up with excellent customer service. We currently sell our products in over 110 countries around the world. All our products are CE marked.

Mast Group

1 H09-2

www.mastgrp.com

Mast Group Ltd is an independent, market-leading manufacturer and supplier of diagnostic products for clinical, industrial and veterinary testing.

Mast® has produced antibiotic susceptibility test (AST) products since 1957 and utilises this expertise to assist the on-going battle against antibiotic resistance. The product range however has been greatly expanded and Mast® now supply a huge variety of customers in hospital, private clinical, public health and veterinary laboratories as well as blood banks, food and water testing facilities and pharmaceutical companies.

Medical Wire & Equipment Co

1 G03-5

www.mwe.co.uk

Specimen Collection and Transport for Microbiology, Virology and Molecular for Clinical, Food and Forensics. High quality range of Liquid and Gel swabs, Flock/Foam traditional Rayon/Cotton. ISO9001/13485 and MDSAP certified. Leading market brand names, Transwab®, Virocult®, Sigma™ Dryswab™ and for 2019 Sigma MM™ (Molecular Medium) DNA/RNA in a single step.

All products manufactured by Medical Wire in the United Kingdom and many global studies confirm products are the gold standard

Omega Diagnostics Group

1 F11-2

www.omegadiagnostics.com

Improving human health and wellbeing through innovative diagnostic products and global partnerships.

Omega Diagnostics Group is focused on selling a wide range of specialist products, primarily in the immunoassay, in-vitro diagnostics (IVD) market within three segments: Allergy, Health & Wellbeing and Global Health

Oncimmune

1 F03-10

www.oncimmune.com

Beating Cancer, One Test at a Time.

Oncimmune is changing how clinicians, researchers and patients view, diagnose and treat cancer. Our technology detects evidence of the body's natural response to cancer, enabling detection 4 years or more before standard clinical diagnosis. Our tests enhance clinical decision-making and are complementary to diagnostic technologies, making them valuable additions to established and new care pathways. We partner with leading developers and distributors to make our technology available globally. Our EarlyCDT®-Lung test is being used in the largest-ever randomised trial for the early detection of lung cancer using biomarkers: the NHS study of 12,210 high-risk smokers in Scotland.

OptiGene**1 G03-7**www.optigene.co.uk

OptiGene has developed molecular diagnostic solutions that exploit the benefits of isothermal amplification of DNA and RNA, in particular the LAMP method. Ultra-sensitive and highly-specific detection of bacteria and viruses can be performed within 30 minutes by personnel with rudimentary training and requiring little sample preparation.

The company has developed compact and portable instruments for running the tests along with the world's fastest enzyme for isothermal reactions. OptiGene also sells software for developing LAMP assays and can assist customers with their designs. Customised instruments can be supplied to OEM customers featuring corporate branding and including special operating features.

Owen Mumford**1 F01-1**www.owenmumford.com

Owen Mumford has been at the forefront of medical device innovation for over 60 years, creating solutions that improve the delivery of healthcare and home health treatments for people around the world.

Our products span devices that make blood testing more comfortable to solutions that make it easier to administer life-saving medication.

Our experience in medical devices began in the 1950s when our founders Ivan Owen and John Mumford established the company. Today, we have direct sales offices and a network of distribution partners serving customers in over 60 countries, and employ over 700 people across the Americas, Europe and Asia.

Owen Mumford**1 F03-8**www.owenmumford.com

Owen Mumford has been at the forefront of medical device innovation for over 60 years, creating solutions that improve the delivery of healthcare and home health treatments for people around the world.

Our products span devices that make blood testing more comfortable to solutions that make it easier to administer life-saving medication.

Our experience in medical devices began in the 1950s when our founders Ivan Owen and John Mumford established the company. Today, we have direct sales offices and a network of distribution partners serving customers in over 60 countries, and employ over 700 people across the Americas, Europe and Asia.

Oxford Immunotec**1 G03-10**www.oxfordimmunotec.com

Oxford Immunotec is a global, commercial-stage diagnostics company focused on developing and commercialising proprietary tests for the management of immune-regulated conditions.

The company's initial product is the T-SPOT®.TB test, an FDA approved and CE marked test for latent tuberculosis infection and active TB disease. For information visit www.oxfordimmunotec.com.

Poth-Hille & Co**1F03-4**www.poth-hille.co.uk

Poth Hille are a specialist wax blending and refining company based in Essex, UK. We have manufactured Histology Waxes since the 1960's.

Poth Hille Modified Paraffin Waxes are sold on a global basis in over 30 countries and supplied as OEM packaging to many recognised brands within histopathology.

Hista-Flex™ is our own branded product conceived from over 50 years experience in formulating and supplying histology wax to the UK and Overseas markets. Hista-Flex™ represents the ultimate in high purity paraffin wax, further enhanced through our own special filtration system and combined with performance enhancing additives.

Priorclave**1 G01-1**www.priorclave.co.uk

The PS range of laboratory autoclaves, designed and manufactured in the UK by Priorclave, represent some of the most robust, reliable and safest sterilisers currently available. With more than 60 standard models from 40 to 700 litre chamber capacity including benchtop, front and top loading as well as pass-thru and powerdoor steam sterilisers plus an extensive range of options and accessories the Priorclave brand will satisfy most laboratory autoclave requirements.

For customers that require a special build to satisfy unique environmental conditions, accommodate difficult site access or chamber arrangement Priorclave has the engineering skills to bespoke design and build laboratory autoclaves at its UK manufacturing centre.

All Priorclave autoclaves are supported by a highly trained and skilled service and support team that lends first hand guidance to ensure customers achieve the most effective and efficient sterilising process

Pro-Lab Diagnostics**1 G03-3**www.pro-lab.com

Pro-Lab distributes as well as manufactures products within the immunodiagnostics area.

The Rodwell Autoclave Company**1 F03-1**www.rodwell-autoclave.com

Laboratory Autoclaves 15 – 770Litres

Spirit Healthcare**1 F03-5**www.spirit-healthcare.co.uk

Spirit Healthcare is launching a range of items for the cost effective management diabetes and other conditions.

On show will be Finesse Insulin pen needles, swabs and cool bags; the Ambulight photodynamic therapy unit and CliniTouch Vie telehealth system.

Starna Scientific

1 G11-2

www.starna.com

Starna, established 1964, has a worldwide reputation for quality, service and innovation in the production and supply of spectrophotometer cells, optical components and Certified Reference Materials (CRMs).

**Starna** scientific

World-leader with over 50 years' experience in the production of Certified Reference Materials for UV-Vis-NIR & Fluorescence spectroscopy; it is the only company to achieve both ISO/IEC 17025 and ISO 17034 for this range of products.

A highly regarded manufacturer of high precision quartz and glass Cells/Cuvettes for Photometers and Fluorimeters.

Starna sells worldwide to instrument manufacturers, pharmaceuticals, life-biosciences, R&D laboratories, medical companies and universities.

Suez Water Purification Systems

1 F11-1

www.suezwater.co.uk

SUEZ Water Purification Systems Ltd designs, develops and manufactures water purification systems for use in applications in healthcare, research sectors and throughout industry. The company specialises in a wide range of technologies, including ion exchange, carbon adsorption, reverse osmosis, ultraviolet irradiation, electro-deionisation and ultrafiltration.

Our products can be supplied as stand-alone units or as fully integrated systems with production capacities up to many thousands of litres per hour. In every case, the company provides full installation, technical and service support. Our customer base includes Analytical Laboratories, Food and Beverage companies, Universities, Hospitals and Clinics, as well as Industrial, Chemical and Pharmaceutical Companies.

All products are manufactured in the UK where our Research and Development, Regeneration, and Administration departments are also located.

We have been established for almost 40 years and we are accredited to ISO 9001:2015, ISO 14001 and ISO 18001, and Medical Device Directive 93/42/EEC.

Surescreen

1 G03-2

www.surescreen.com

Modern point-of-care diagnostics allow for fast, clean and efficient systems which empower you with the knowledge to make informed decisions within minutes of meeting the donor.

Combined with the latest Occupational Health practices, SureScreen offer the complete package for your on-site screening and testing needs.

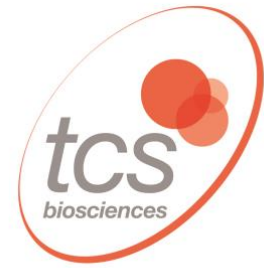

We are an award-winning, UK business, who lead the European market in diagnostic health testing. For over 20 years we have supplied high-quality health screening products around the world, believing pro-active diagnostics greatly benefits people's health.

TCS Biosciences**1 G03-1**www.tcsbiosciences.co.uk

TCS is a manufacturer and distributor of laboratory reagents, test kits and quality control reagents for the Clinical, Pharmaceutical, Food and Water sectors.

In our 54 year history we have established ourselves as Europe's foremost supplier of animal blood and sera for microbiological use. We are also a prominent player in the UK water industry and in the European pharmaceutical market.

We are focused on developing our presence and product portfolio in each market sector, without compromising our core business value: Quality.

True Indicating**1 F03-3**www.trueindicating.com

True Indicating LLC is a privately held organization established in 2017, providing the highest quality products and expert services to manufacturers of medical devices and healthcare products, pharmaceutical and biotechnology companies. We provide strategic guidance and support to help clients develop, monitor and advance their sterilization and disinfection monitoring products and processes.

With over 35 years of combined experience, our focus is science based service allowing for identification of True solutions and True partnership with our clients.

Vision TriTeQ**1 F03-7**www.visiontriteq.com

Designers and manufacturers of ergonomic inspection systems including the latest innovation, the DEEP REALITY VIEWER (DRV).

DRV is a glasses-free, digital, stereo image presentation system designed to provide fully interactive, real time, natural 3D visualisation with outstanding depth perception.

Woodley Equipment Company**1 G11-4**www.woodleyequipment.com

Woodley Equipment supplies laboratory diagnostic equipment for human and veterinary markets.

Woodley Laboratory Diagnostics specialise in niche Point of Care solutions and acts as master distributor across EMEA regions for QBC dry haematology analysers, QBC fluorescence microscopy solutions, Arkray POC, Vision Microscopes and Clinispin centrifuges.

Woodley Veterinary Diagnostics acts as the master distributor for worldwide veterinary laboratory diagnostic products including biochemistry, haematology, coagulation, critical care, blood gas and electrolyte analysers and several handheld meters.

Woodley are launching at Medica their newly developed range of Veterinary Analysers for Worldwide Distribution.

Both divisions are seeking distributors.
